Caviuna, Cabiuna, Candeia do Sertao, Caviuna Rajada, Violeta do Sertao, Caviuma Vermelha.

GROWTH AREA

Latin America

TECHNOLOGICAL FEATURES

It has a reddish-brown to brown color, with brownish-yellow or purple highlights and lighter streaks. The wood is hard, firm, heavy with straight grain, and medium to fine texture.

DRYING METHOD

Drying can be done without too much difficulty, but if done too quickly it can cause cracking.

SPECIFIC WEIGHT

At 12% humidity its specific weight is about 750 Kg/m³.

MAIN USES AND WORKING

It is quite durable and weather-resistant even when used in wet locations. Used for shipbuilding, scaffolding, floor planks. It is used in the furniture industry as a fine veneer because of its beautiful decorative aspect.

ZANUSOlegno

"Details make perfection
and perfection is not a
detail."
